

## Table 2 - User Survey

The English version of the user survey is attached. While Table 2 requires an actual count of total users, the demographic distributions of those users by age, gender, race, ethnicity, need for interpretation services, income level, and pay source may be based upon estimated data if actual distributions are not available. The user survey can be used to obtain demographic data from a relatively small sample of your users, rather than all users. The Uniform Data System software includes a routine for entering and summarizing the data collected on the user surveys. Once survey data are entered, the software can automatically complete Table 2.

As indicated in previous materials and training, the survey is not required but can be used if you do not have a means in place for obtaining the necessary demographic data for users of your services. If a survey is to be conducted, a minimum sample size of 200 surveys is required. Random sampling techniques should be used to assure valid data. The user survey has been updated from the survey provided last year to reflect the year 2001 poverty guidelines.

Have staff administer the survey to randomly selected users. Patients may complete the form independently but support should be offered if needed and surveys inspected upon completion to be sure patients understood the questions. Sampling patients over the course of the calendar year including all seasons, days, times of day, and service units being reported will help ensure a random sample and will spread the survey workload. Only permit one survey per patient per year. Simply putting surveys out for those patients who are willing to complete them and using that data will not produce valid results. It is considered acceptable to use survey data from before the start or after the end of the 2001 calendar year, provided the users of your services during the sampling period is reasonably reflective of your users during 2001.

Please call the support line at 888-459-1080 or send an e-mail to [udshelp@nhscdata.net](mailto:udshelp@nhscdata.net) if you have questions about how to conduct a survey or use the survey routine in the software.
